Case #1 - Meridian Institute of Technology

Extension of Approval | Year 2026 | State: Under Scrutiny

Internal consistency and AI anomaly signals are NOT issuing-authority authentication. All regulatory references below are SAMPLE / DEMO rules.

Laboratories conflict - High

Application Form says 18; Room Inventory says 15. These are internally inconsistent claims, not proven misrepresentation.

Rule: SAMPLE-LAB-001 v1 (SAMPLE / DEMO)

Evidence A: meridian-application.pdf, page 1, field laboratories, bbox [50.0, 160.0, 136.7, 176.5], value 18

Evidence B: meridian-room-inventory.pdf, page 1, field laboratories, bbox [50.0, 160.0, 136.7, 176.5], value 15

Next action: Compare both source pages; request reconciled records or verify on inspection.

Cross-institution similar document: Building Certificate - Medium

meridian-building.pdf resembles blueridge-building.pdf submitted by another institution (exact SHA-256). This is a review signal, NOT proof of reuse or forgery.

Rule: SAMPLE-DUP-001 v1 (SAMPLE / DEMO)

Evidence A: meridian-building.pdf, page 1, field sha256 / perceptual hash, bbox [], value ae0addac0847ed

Evidence B: blueridge-building.pdf, page 1, field sha256 / perceptual hash, bbox [], value ae0addac0847ed

Next action: Inspect both copies and seek authorized confirmation of document identity.
